Fill in the blanks by listening to the audio file (see link/QR code below the dialogue).

Do you think climate change is \_\_\_\_\_  
affecting us?

Yes, there are \_\_\_\_\_ that show changes in  
the last 30 years.

Why in the last 30 \_\_\_\_\_?

Climate is defined as a \_\_\_\_\_ of at least 30  
years. So, to be able to look at changes, we have to  
look at the last 30 years.

That's interesting. I didn't know that. And \_\_\_\_\_  
actually changed?

Many things have been changing. Glaciers and ice  
caps are melting, and storms are becoming more  
\_\_\_\_\_.

But is that really so \_\_\_\_\_?

We don't really know. Humans have adapted to climate in agriculture and many other areas. Fast changes are difficult to \_\_\_\_\_ to.

I'm not sure I understand. Can you give an \_\_\_\_\_?

For example, less rain and more droughts. Farmers will have to change what they produce because their old \_\_\_\_\_ won't get enough water anymore.

That makes sense. My uncle is a corn \_\_\_\_\_ and highly specialized. I don't think he could just change his whole farm without losing a lot of money.

And that is just one example. That's why many people are \_\_\_\_\_.
