

What can we do to produce less CO2?

I think we should reduce our consumption.

How? We can't really eat less, right?

We can't eat less, but we can stop throwing away so much food.

That's true. Our society throws away so much good food.

We could also stop buying new clothes multiple times a year.

You have lots of good ideas. What else can we do?

In general, we should always ask ourselves if we need to buy something new.

I was just thinking about buying a new bike, but maybe I shouldn't now.

How about buying a used bike?

Good idea. I will do that. Thanks for all the input.

No worries, you are welcome!
