Solutions: I'm installing some solar panels on my roof this week. / Really? I've been thinking about doing that too to cut down on my electricity bill. / That's one reason why I'm doing it. I also don't want to use electricity from coal or nuclear power plants anymore. / But what are you going to do at night? / I'm still connected to the grid. But I'll try to let things like the washing machine or the dryer run during the day with solar electricity. / Good idea. Are the panels expensive? / They aren't cheap, but electricity is so expensive that they will pay themselves off in a couple of years. / The city is also building a couple of wind mills in the hills. / I'm glad they are finally living up to their promises and are investing in renewable energies. / Me too. Oil and coal are eventually going to run out. We can't just ignore it and leave it to future generations. / I see we are on the same page with this topic. It was fun talking to you.
