I'm considering getting an electric car. What do you think about them?

I'm not sure. I like the idea of using electricity instead of gas.

Me too. But I read that they emit more emissions when produced.

And you need to use electricity from renewable energies.

Yes, I read that too. Only when you use energy from renewable sources does an electric car make a difference.

I think the biggest problem is the batteries. They still need improvement but more people buying one will increase pressure on the companies.

I guess you're right. And my electricity comes from a green provider.

Do you plan to drive long distances with the car?

No, not really. I just need it to get to work and run errands.

The infrastructure for electric cars is also constantly improving. I think you should go for it!

Thank you for all your input!
