I have a flat tire.

Mein Motor macht ein seltsames Geräusch.

My engine is making a weird noise.

What do you have to do to get a license in Germany?

How you get a driver's license will vary depending on what country you're in. In Germany, for example, you have to turn 17 before you can apply to get your license. You must pass both a theoretical and a practical exam, and are then only allowed to drive with someone over 30 until you turn 18. After you receive your license, you go on a probation period for 2 years. If you break any major traffic laws during this time, then you have to go back for more driving lessons and pass another test. If you do not break any traffic regulations during this time, then you will become a fully licensed driver.

What are some of the most important things to keep in mind when driving in German-speaking countries?

Following all road safety laws is the most important thing to do when driving in a German-speaking country. Keep in mind that laws can be different depending on what country you're in. Make sure you look them up before you go driving anywhere new. Other than this, it's important to pay attention to road signs, like stop signs and speed limit signs. You should also always drive on the right side whenever you're in a German-speaking country.
